Summary

1. Full-stack developer with experience in scalable web apps and AI tools
2. Skilled in Java, JavaScript, React, Node.js, and backend development
3. Strong at rapid prototyping and building real-world SaaS products
4. Proven collaboration in high-pressure hackathon environments

Skills

- **Languages:** Java, JavaScript, Python, HTML, CSS, SQL
- **Backend:** Node.js, Express.js
- **Database:** PostgreSQL, MongoDB, Mysql
- **Tools & Platforms:** Git, GitHub, Vercel, Render, webflow, framer, AWS
- **AI/ML:** OpenAI APIs, LLM Prompt Engineering, tensorflow
- **Others:** REST APIs, CI/CD (GitLab), DevOps basic

Projects

Weather App | [Live](#) | [GitHub](#)

- Built a responsive weather application that provides real-time weather information based on user-selected cities.
- Integrated weather API to fetch temperature, weather conditions, humidity, wind speed, and other live weather data.
- Designed a clean and responsive React-based UI with dynamic weather information and intuitive search functionality.
- Implemented API handling and dynamic rendering to provide updated weather data based on user input.
- Deployed the application on Netlify for live access.
- **Stack:** React.js, JavaScript, HTML, CSS, Weather API, Netlify

MovieFinder | [Live](#) | [GitHub](#)

- Built a movie discovery web application for searching and exploring movies using the TMDB API.
- Implemented movie search functionality with dynamic results including posters, ratings, release information, and movie details.
- Designed a responsive and user-friendly interface for browsing movies across different devices.
- Integrated API-based data fetching and dynamic rendering for real-time movie information.
- Deployed the application on Netlify with a responsive frontend experience.
- **Stack:** React.js, JavaScript, HTML, CSS, TMDB API, Netlify

SpendWise — Personal Expense Tracker | [Live](#) | [GitHub](#)

- Built a full-stack personal expense tracking web application for managing income, expenses, budgets, and financial activity.
- Implemented transaction management with add, edit, delete, search, filtering, categories, and date-based tracking.
- Integrated Supabase for cloud database storage and user authentication, enabling persistent and user-specific transaction data.
- Designed an interactive dashboard with balance summaries, spending analytics, monthly budget tracking, charts, and financial insights.
- Deployed the application on Netlify with environment-based Supabase configuration for production.
- **Stack:** React.js, JavaScript, HTML, CSS, Supabase, PostgreSQL, Netlify

Education

B.Tech/B.E. in Computer Science | Shri Shankaracharya Technical Campus , Bhilai

- Expected Graduation: 2028
